\$2.00 A YEAR; 5¢ A COPY

NEW PLAYGROUND EQUIPMENT PUT IN AT DIDSBURY SCHOOL

The Trustees of Didsbury School District No. 652 believe, along with most of the parents, that play is one of the essentials to good health, together with a good education, and last spring it was decided to add to the playground equipment.

Recently this new equipment arrived and last week the high school boys of the shop class, under supervision, went to work on the installation of the new swings, teeter totters, etc., and by the week end the supports for the new playground facilities had been cemented in and everything made ready to set up the equipment.

Added to the old equipment of merry-go-round, slide and basketball facilities, the Didsbury school now boasts of its modern playground equipment, and this is one item of expense which the tax paying parents should not object to.

LONG YEARS AGO

October 19, 1904

Local firms here are paying 7 cents a pound for dressed pork.

J.A. Klassen arrived Tuesday with two cars of stockers for his ranch.

Four cars of potatoes have been shipped from Didsbury so far this season.

Jerry Shantz threshed his wheat Monday. The yield was excellent—51 bushels to the acre.

A prairie fire six miles east of here Saturday afternoon burned a strip about four miles long before it was checked.

An animal, said to be a black panther, has killed several cattle northwest of town the past few weeks.

ALBERTA'S 1945 FIRE LOSS SHOWS BIG INCREASE

Alberta's fire record loss during the last five years has shown a steady increase from \$1,856,335 in 1941 to \$2,208,102 in 1945 according to official statistics issued by the Dominion Government and released by the Western Canada Insurance Underwriters' Association. During this week, October 6th to 12th, all over the country underwriters' associations are collaborating with the government of the Dominion to impress upon the public the ever-increasing losses which are destroying lives, and property totalling millions of dollars.

Official investigations show that a large proportion of the losses are due to the absolute carelessness in the use of cigarettes, pipes and cigars and through faulty stoves, furnaces and heating equipment and through defective electrical wiring and appliances.

At this time of natural shortages, the public will probably be more serious, particularly in view of the shortage of housing accommodation. Last year for instance, nearly 40,000 residential properties were destroyed or damaged by fire representing a loss of over \$8,000,000.

NEW BEEF CONTRACT WITH BRITAIN READY FOR SIGNING

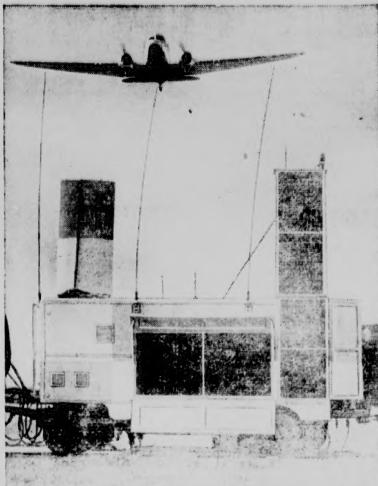

New beef contract between Canada and Britain has been prepared and is ready for consideration by the Dominion cabinet, an Ottawa resort said early this week. Information is that the new contract calls for an increase in price of 2¢ a pound, and that the contract will be for one year.

Canada's last beef contract with the U.K. called for delivery of a minimum of 60,000,000 lbs., and the value set on it was \$12,450,000.

R.A.F. RADIO AND RADAR TO AID CIVIL AVIATION

The R.A.F. Radio and Radar aids to navigation were demonstrated to the delegates at the conference of International Aviation held in London recently. The equipment which played a very important part in the

sector in the air was demonstrated and discussed for the benefit of Civil Aviation all over the world. Picture shows: A demonstration of Radar Control which will bring in and land a plane with "Nill" visibility.

MISS RUTH CRAWFORD GIVES ADDRESS AT WORDIE HOME

Miss Ruth Crawford from the Department of Agriculture, Ottawa, gave a short address and showed a film on the preparation of fruits and vegetables for freezing at the Wordie home of Mr. and Mrs. J.W. Wordie last Friday afternoon from 3 to 4 p.m.

Owing to the short notice received, there were not many present, but the talk and pictures were interesting and educational.

MISS RUTH CRAWFORD FROM THE DEPARTMENT OF MOUNTAIN VIEW

Following is a summary of the Municipal District of Mountain View's 1947 Assessment, recently compiled by secretary-treasurer A. Brusso. Total acreage assessed is \$12,337.96, with a valuation of \$12,352.07.

Because black surfacing makes night driving difficult, white traffic lines will be painted on finished highways in Alberta as soon as possible. Works Minister W.A. Fellowes said.

New blacktop asphalt surfacing has been put on sections of the Edmonton-Calgary highway and the Calgary-Halfway highway but it has been found that car headlights "lost clearance" in the dark blackness after dark, he said.

Too finishing of highways will continue until freeze-up.

DOMESTIC WHEAT PRICE UNCHANGED

The price of wheat for human consumption in Canada is to continue at a statement made by Hon. J.A. MacKenzie, minister of trade and commerce.

The price Canadian farmers will receive for wheat used for human consumption is to continue at \$1.25 a bushel, basis 1 moraine in the terminal. The federal government paid the difference between the \$1.25 a bushel figure and the 77¢ a

Coal is needed more than food in Europe according to a delegation of agriculturists from the United States who recently visited the continent.

We must not waste what others have. Pare your food for immediate use only. Waste nothing. Share with the hungry!

WOLF, COOTYE REPORT TO STOP FOR WINTER

Bounty on wolves and coyotes in Alberta will be discontinued on October 1st this winter, it was announced last week by a provincial government official.

Bounty on coyotes usually is cut off on that date, but the bounty on wolves, \$25, has been continued throughout the winter months for the past few years.

The government found continuation of the bounty on wolves through the winter actually made little difference.

Both coyote and wolf pelts have a market value during the winter and an additional effort of a bounty is not needed, officials say.

CROP DAMAGE BY DEER REPORTED IN BURNSIDE DISTRICT

Report of coyotes causing sheep ranchers to go out of business brings to mind another serious menace—the deer around this part of the country which are doing considerable damage to crops and grain crops which are now in storage and ready to be harvested. Farmers are saying it will be hard to keep harvest help in the hopes that favorable weather will once again allow them to complete harvesting operations, but in the meantime the deer are eating up the profits and losses of a number of farmers.

Local farmers are open season on the C.P.R. rails line, and even if there were no hunting season, the deer would not be allowed to eat the grain.

Local farmers are open season on the C.P.R. rails line, and even if there were no hunting season, the deer would not be allowed to eat the grain.

A number of farmers are putting in oil burners in their coal ranges and heaters. By the time our government fulfills election promises and discusses the power company gets around to the re-estimation of electricity rates, the oil burner electric stove that should have been had the power been installed before oil burners were put in.

Mrs. George Hergert of Calgary visited over Thanksgiving with her daughter, Mrs. Walter McCullough.

Christmas is still hanging on, and no one knows when it will be finished.

Saturday morning radio listeners to CMC Edmonton enjoyed a lovely voice singing "Victory Is Ours." This was the song written by Mr. and Mrs. George Clark who composed the music along with the words. The song was published and is now on sale in sheet form. The district is proud of our local music.

We miss Ruth Crawford from the Department of Agriculture, Ottawa, gave a short address and showed a film on the preparation of fruits and vegetables for freezing at the Wordie home of Mr. and Mrs. J.W. Wordie last Friday afternoon from 3 to 4 p.m.

Rosebud Flour Mill Has Good Market For Products

LOCAL Y.F.C. REORGANIZED

The Youth for Christ program was well attended and enjoyed at the opening service with Rev. and Mrs. Louis Paul Lehman Jr. held in the M.C.C. Church Sept. 30th. After the meeting, Mr. and Mrs. D. W. Whiteman, chairman, George Brown, vice-chairman and Eddie Hunsperger, secretary, reorganized.

The Rosebud Flour Mill, operated by Mr. M. Weber, has been a busy concern the past few weeks and recently completed loading of a carful flour consigned to China.

With winter weather not far off other products of the flour mill, including flour, meal, flour, etc., have been in heavy demand by whole-salers all over the west, and with the shortage of help Mr. Weber says he is hard pressed at the present time to keep up with the orders.

WE'RE ROSEBUD. Rosedale Flour Mill, which is market as far east as Winnipeg, the British Columbia market has not been quite so promising, but negotiations are now underway by B.C. interests to distribute Rosebud products in that province, but with a favorable market the western market he is hesitate to make definite promise of distribution east of Winnipeg at the present time.

Rosebud Flour Mills had a steady contract all through the war years with the Food Administration Board to supply flour to Europe. The new peace-time contract has been renewed, assuring steady operation of our local mill.

Recently Mr. Weber commenced a fall and winter advertising campaign in the Calgary Herald, the Edmonton Bulletin and Edmonton Journal in an endeavor to promote sales and establish confidence in the famous Rosebud products.

HAIL DAMAGE DOWN, INSURANCE BOARD RESERVE INCREASED

Hail damage only 70 per cent of normal and a record amount of insurance written combined to give the Alberta Hall Insurance Board an excellent season, it is reported by J. Glen Elfer, the general manager. The new peace-time revenue will be the same as in the 1945 season, but it brought the reserves up over the figure at the beginning of 1945. At present more than \$1,000,000 is held in reserve, putting the board in a position to meet the demand of an extremely heavy year.

The risk written this year was \$17,500,000, compared with \$10,350,000 in 1945.

Three million acres were insured this year, compared with 1,800,000 last year. The previous high was in 1946 when 2,340,000 acres were insured.

Farmers taking out board insurance number 16,650 this year, 5,800 last year and 12,900 in 1945.

The board paid out \$810,000 in claims and adjustment expenses this year, more than \$1,000,000 last year.

About 3,000 farmers received hail damage this year, but the total damage was only 70 per cent of normal. The large map on the wall of Mr. Elfer's office has the hail damage marked with pins. The pins are fairly well concentrated in five areas:

1. Pigeon Lake east through Wetaskiwin and Camrose almost to Viking.

2. Dog Pound east to Acre, with one branch going north east through Big Valley and Castor and the other south east to Dunvegan.

3. From west of High River east to Queenstown.

4. St. Paul and Parkland districts.

5. Champion and Carmangay districts.

Losses this year started out early and hence last late in the season than are unusually light.

The board was set up in 1938. It writes about 75 per cent of the hail insurance taken out in Alberta.

TO KEEP ALASKA ROAD OPEN ALL WINTER

The Alaska Highway, now open to restricted civilian traffic, will be kept open all winter by the Royal Canadian Engineers. The highway is said to be in perfect condition with the Canadian army keeping 18 maintenance camps about 90 miles apart along the route.

WORLD HAPPENINGS BRIEFLY TOLD

London's sugar crop this year will exceed 170,000 tons, largest for several decades, it was announced.

A special police squat division at the East End, Newcastle, England, every Sunday to curb street gambling.

A vast network of research centres and laboratories spread throughout the Soviet Union is working on the secrets of atomic energy.

Spotlight on the British coal situation. Great Western Railway locomotives working in the South Wales coalfield are being converted to oil.

Mrs. Emma Chapman Algarde, Liverpool, died, yesterday, at seventy at the age of 102, worked in the sugar fields up to last year and walked a mile to draw her pension.

Ducked in a heavily-sealed small parcel, £3,000 (\$12,000) worth of platinum was flown from London to Rio de Janeiro by British South American Airways.

Housewives looked enviously but didn't take a single one when thousands of packets of rationed dried egg powder fell from a passing truck in Bristol, England.

Hugh G. Cooper, member of the Canadian Legion Leader, Duncan, B.C., said that selection of a distinctive flag of a country must be made by those versed in the science of heraldry.

Winston Churchill has had his name inscribed in the "Golden Book," the book of honor of the Jewish people, in appreciation of the part he played as Britain's wartime leader in the formation of the Jewish brigade group.

A New Adventure

Clerks Will Soon Be Sorting U.S. Mail In Sky

At the turn of the century the mail service captured the fancy of adventurous youth by offering postal jobs on the steam cars. There was zest! In rolling post offices, hooked directly behind the locomotives, a clerical youth would man with his pitches while hurtling across the country at a mile a minute. Boys thronged to this new excitement, boys who gloried in speed.

Today the Post Office Department and Air Transport Association are planning to mail sorted letters in 38-foot flying packets to be modified mail cars. Clerks soon will sort in the sky. Motors roaring toward the stratosphere, wings slicing the dawn, props churning moonbeams—the mail dangles fresh excitement for the public.

We're betting these jobs will be snapped up as soon as they're available. Boys always want to go—fast, high and far—New York World-Telegram.

PLAN BIGGEST TELESCOPE

British optical engineers are eager to carry out what would be their biggest job—construction of the 100-inch telescope planned as a national memorial to Sir Isaac Newton. Estimated cost of the telescope is between £1,500,000 and £2,000,000. It will take several years to build.

DO THIS FOR

Night Coughing

WHEN A COOL STUFFS UP THE NOSE, CAUSES COUGHING, AND MAKES IT TICKLE AND NIGHT COUGHING, USE THIS COOLING VICKS TREATMENT

TO GO TO WORK INSTANTLY...

2 1/2 oz. Vicks Vapo-Rub

At bedtime rub good Vicks Vapo-Rub on throat, chest and back. The cool, cooling, STIMULATING action bring relief of distress.

It is good to upper breathing passages with soothing medicinal vapors. It STIMULATES the mucous membranes, warming, comforting poultice... and it keeps on working for hours, through the night. It relieves coughing spasms, relieves muscular soreness and tightness—and through gradual absorption it to-night... Vicks Vapo-Rub.

To make the family clothes she took a stone scraper and went to work on the hide of a deer or antelope.

Then she had her many cooking and storage pots, bowls and jars to wash and bake. When finished she would paint them, using her own design or matching a particularly attractive color scheme from the jars of a neighbor in the next apartment.

Life in this part of the nation around 1300 A.D. was good. Game was plentiful, the farms productive. Abundant forests were near by. At least 5,000 people lived here at this time. Why was the area abandoned and the civilization allowed to die? "That," says Dr. Hurley, "is still one of the challenging problems facing us."

"It must have been some tremendous pressure which drove the Anasazi out of this area in the 14th century." No signs of war or conflict have yet been found.

Something In Common

City Of Calgary Shows Originality In Restoration Of Her Historic Past

Calgary and Ottawa have one thing in common. That is—extraordinary to say, the same. The Royal Ontario Museum in Ottawa has the finest collection of dinosaur fossils in the Dominion, and perhaps the world. The city fathers of Calgary must have been asleep while the fossil hunters were combing the Red Deer River around Drumheller for these specimens. However, they have repaired their oversight in a remarkable way.

St. George's Island lies in the Bow River at its confluence with the Elbow. In the park which covers the whole island the city has built a series of terraced paths, steps, platforms and ramps. They look exactly as the scientists say, they looked 100 million years ago.

Dominating one view is a huge herbivorous beast beneath which a motor car may readily be driven. It stands over one hundred feet high, a Spinosaurus, I think. There are also ferocious looking flesh-eaters a short distance away. One of them is just emerging from a little stream where swans now feed.

In two large outdoor glass cases are a few skeletons, including a herculean dinosaur, and some separate bones. But, compared with their days of greatness in the Mesozoic age, they make rather a pitiful showing.

The City of Calgary has shown originality in this restoration of her prehistoric past.

It will long be remembered by the tourist as a symbol of the city's progressiveness.

OUR COMPLETE SHORT STORY

The Wrong Scent

By GEORGE N. JAMES

Copyright Wheeler Newspaper Syndicate

FOR the past few days Mr. Ebenezer Twigg has been going around with more sandwiched up. Just who is responsible for this condition no one seems to know unless it be young Stan Brown, old S. H. Kent, or the Rev. Miles. Anyhow most folks here in Clarksville is pretty pleased to see Mr. Twigg suffering this way. They allows it serves him right.

For plain downright trouble making, Ebenezer Twigg is way ahead of anyone else in Clarksville. Folks blame it on that nose of his. Long ago when he was a boy he got it at the ends. On account of this here nasal organ Mr. Twigg kin smell any scandal or other kind of Buckus when it's miles away. In fact, this same nose has more than once smelled trouble when no trouble existed.

Just to give you an idea of the kind of person this here Twigg is, there ain't nothin' that is ever perfect in his eyes. He's always writin' letters to the paper, complainin' about one thing and another. One day it's the dirtiness of his neighbor's front yard and the next it's about the internal noise his neighbor's lawnmower is makin'. That long beak of his is forever pokin' into other folks' affairs.

It was a wed day for young Mr. and Mrs. Stan Brown when they comes back from their honeymoon to occupy the apartment right next to Mr. Twigg's. Thet long nose of his fair quivers with joy, like an old air horn that smells the taste of bacon. Now, makin' a blues is somethin' that Mr. Twigg can abide no how. Blickerin' and quarrelin' he kin appreciate but, these here honeyed words of young married folks is way beyond his ken.

Mr. Twigg figures that if he waits long enough he'll wear them quarrelin' words right off his nose and then he can press to the wall that separates him from the young couple. He kin hear them talkin' all right, kean hear that sweet liltin' voice of Mrs. Stan and the jolly runbin' talkin' of the two young ones. All he can do is to make a hasty retreat to Mr. Twigg's dispat, not one cross word does he hear. This constant listenin' does one thing for Mr. Twigg. He becomes so familiar with the sound of them two pieces that he'd swear he could pick them out of a crowd.

Well, sir, it's maybe two weeks since the young Browns moved in. Mr. Twigg, early one evenin', is passin' by their door on the way to his own room. He hears voices and jests from inside. He takes a few steps to the left. The noise is risokin'.

"Darlin'," he says, mushy-like, "I love you. Every day you grow more beautiful than ever."

Mr. Twigg's nose twitches with delight. That voice don't belong to Stan Brown. To make sure Mr. Twigg claps his hand to his heightenin' nose. The room ain't with in his line of vision. All aquiver, here Twigg person stocks around and listens. By and by he hears Mrs. Brown's voice.

"You know I love you, too, John," she says. "I wish you that you understand what I'm doin'?"

Mr. Twigg is sure joyful when he hears this. She says "John" and her husband's name is Stan. He must act pretty quick. Ah! He would find Stan Brown and tell him to git home as quick as possible. The sounds were sometimes a mite too cantharidous. By golly. Witness! Yes, sir, he'd bring whores up and surprise this hussy. Flout a love affair under Mr. Twigg's very nose, would she? He'd show her the trolop!

Mr. Twigg no sooner reaches the spot than he spied old S. H. Kent. Here's a lit of luck because S. H. happens to be young Brown's boss.

"Mr. Kent!" calls out Twigg. Then he tells him the whole story. Mr. S. H. flares up and says "Look out, old man! If he finds out what the truth just at that moment, who should come by the Rev. Miles. On hearin' the deplorable state of affairs, he consents to be witness No. 3.

With Mr. Twigg leadin' the way, the procession climbs the Broad Street steps to the door. Mr. Twigg holds up his hand for silence.

"Then you will fly with me to-night, my beloved one," the feller is sayin'.

"To the ends of the world?" answers the girlie.

Mr. Twigg glances significant-like through the door and the three of them burst into the room. "A purty occurrence," snorts Mr. Twigg.

Then his mouth falls open and he stands there grinnin', his face the color of a ripe tomato. There they are. Mrs. Stan Brown and her little son, Eddie, all grown ghetes. "What the devil?" he asks, "is the meanin' of this intrusin'?"

Old S. H. Kent looks as though he's goin' to have a strok at any moment. "The fact is Brown," he says, "we expected that, er, ah, him." Then he turns on Mr.

Rationing Expected To End When New Book Runs Out

The new ration book No. 6 is expected to be the last ration book to be issued, Didsbury Board officials said. They confirmed that the absence of the usual application blank in the new books means that it is expected to see the consumer through to the time when rationing will be discontinued. The No. 5 book lasted approximately 10 months, a spokesman said. "It is thought the book now being issued will end rationing. That is as far as we can go at the moment."

SMILE AWHILE

Hoping to get a rise out of the farmer, the wife held by the road, a fellow called.

"Hey, did you see a wagonload of monkeys go by here?"

"No," replied the farmer, "did you fall off?"

"I am deeply obliged, gentlemen, for your interest," speaks up young Brown. "The fact is my wife has been a widow for a year and I am a bit of a scamp. Possibly because I have to raise my voice to record properly, the righteous Mr. Twigg did not recognize it."

As stated before, Mr. Twigg is goin' about now with his nose in a bandage. Apparently he can't smell so much trouble of late.

Squire Perkins: Well, after I die I wish you would marry **Dear** **Con** **Brown**.

Nell: "Why so, Hiram?"

Squire: Well the Deacon trimmed me on a horse trade once.

Small girl (to seven-year-old friend): "Oh, I think you're lots better looking than your daddy."

Boy (true child of the motor era): "Well, I oughta be—I'm a later model."

A doctor's little daughter, deeply interested in radio, glances one morning into the office where her father was testing the heart and lungs of a patient.

"Getting any new stations, Daddy?" she inquired.

Magistrate: "You cannot drive for two years, for you're a danger to pedestrians."

Police: "But, Your Honor, my living depends on it."

Magistrate: "So does theirs."

Bride: "My husband advises my taste in men so much his mother likes to have me discard one."

Mrs. Longwood: "My husband also wants me to keep on wearing my old hats, but he isn't clever enough to think up a nice excuse as . . ."

Newspaper Contributor (in letter): "I am a speedy worker. I finished the enclosed article in an hour and brought nothing but . . ."

Editor (replies): "I got through your article in a fraction of that time and thought just the same."

"You can get anything at a price," says the shopkeeper, "but a man like me can't afford to have me discard the lady next door."

"Everything, ma'am, but a male," sighs the spinster.

Radium's radio activity lasts for centuries, and is only about half dissipated after 2,000 years.

Thinks Scientists Could Be More Efficiently Employed

Claim That Young People Of Canada Do A Lot Of Loafing

The scientists are nonplussed with the buzz-saw again. Some of the best of them at MIT are going up 40,000 feet in a B-29 gunning for cosmic rays, which, if a laudable experiment, is not one that can be expected to bring in into parts, called mesons, that are millions of times more muscular than anything released by an atom bomb.

We wish the professors would do these things. If they should get to do these things, they should be greatly pleased; moreover, they have already given the world more knowledge than it can ever comprehend, let alone use, and, furthermore, there are so many needed things they might be doing right here on the ground.

Let them invent, for instance the wretched radar the Chattanooga Times is agitating for a device that will tell a shopper at a glance whether a watermelon is the *the*. The device with cosmic rays—New York Times Magazine.

MONEY FOR DEFENSE

It is a startling and somewhat

commentary on the state of the world

that the members of the United

States' new budget will be devoted

to defense. Of \$41 billions voted by

Congress for the year which began

July 1 last the War and Navy De-

partments get \$11 billions.

BIG WAS HIGHER

The number of people in the United States going to church every Sunday with their grandad.

"Billy," said the minister one Sunday, "I've been giving you a dime every Sunday to keep your grandpa from sleeping, yet he sleeps."

"I know," said Billy, "but Grandpa is giving me a quarter to let him sleep."

Banknotes are said to be made from old shirts. We always wonder what happened to those we lost at the races.

Soldier Rehabilitates Civilian!

JIM . . . home from the wars, was worried about his business and his old partner and friend . . .

FRED . . . who had jumpy nerves and thought it might be too much war, but . . .

JIM SAID TO FRED . . . "I think you're drinking too much tea and coffee . . . so . . .

FRED . . . switched to Postum and became his old smiling self again, and . . .

JIM . . . beamed, because that was two rehabilitation problems solved!

• Yes . . . Postum is the perfect tea to stop drinking tea and coffee if the caffeine in these beverages is upsetting your nerves. Postum contains no caffeine nor any other stimulants or drugs. Make Postum right in the cup by adding boiling water or hot milk. Costs less than a cent a serving.

Member of the Canadian Weekly Newspapers Ass'n, and of the Alberta Division of the C.W.N.A.

ED. J. ROULEAU, Editor & Publisher

Editorial**RURAL ELECTRIFICATION POSSIBLE IF COMMUNITIES GO AFTER IT**

A couple of weeks ago "The Pioneer" published a short editorial on rural electrification, and since then we have been informed that the power companies in Alberta are anxious to establish rural power lines throughout the province, but are held up mainly by lack of material.

It has also been brought to our attention that almost 50 petitions have been received by the Calgary Power Company from communities desiring to have rural electrification established.

As was pointed out by Mr. Martin, dominion government analyst, the district that is really anxious to get electricity as quickly as possible should organize itself, draw up complete plans of the location of subscribers, and submit these to the power company concerned.

The Didsbury district, both east and west of town is well settled and from previous expressions of residents it appears that farmers would like to see the power lines put in as soon as possible. If this is still the opinion of the farmers we would urge someone in the district, vitally interested, to call a meeting as soon as harvesting is completed and lay plans for rural electrification. These plans, accompanied by a signed petition of all residents desiring farm electricity, would no doubt receive every consideration by power company officials, who are no doubt as anxious to serve this thickly-settled district, as the residents are to have the power.

FARM ACCIDENTS NUMEROUS

With the increase of power machinery on farms the past number of years came an increase in farm accidents, and the largest casualty comes from the Knee Hill Valley in the Innisfail district where Ed. Walford was painfully hurt and stripped of all clothing but his shoes when his clothing became entangled in the power-takeoff of his tractor hook-up to the combine.

Fortunately Mr. Walford's clothing tore from his body on the accident may have been fatal, but this should serve as a warning to all farmers operating power machinery. Carelessness is the main reason for most accidents, although this is not always the case, and the operator of machinery should always be on the lookout for possible sources of trouble and accidents.

PIANO TUNING

Virgil Goulson, tuner for Heintzman and Co., will be in Didsbury about October 18th. Leave orders at The Pioneer office or the hotel.

ADVERTISE REGULARLY IN "THE PIONEER"**TO OUR CUSTOMERS**

A Patridge Dividend will be paid to our customers on deliveries of wheat, oats, barley, flax and rye made to our elevators during the crop season July 1st, 1945, to June 30th, 1946.

IN ADDITION, it is our intention to pay a Patridge Dividend on deliveries of wheat, oats, barley, flax and rye to our elevators during the present season if the earnings of the Company will permit.

NOTES FROM THE WEST

(Too late for last week)
The meeting of the Elton Willing Workers has been postponed owing to the illness of the hostess, Mrs. T. Bagshaw, and a date will be set later.

Mrs. Gaetz of Calgary spent a few days with her daughter, Mrs. K. Koushoushian.

Mr. and Mrs. A.L. Hogg and Mr. and Mrs. C.S. Hogg were dinner guests with Mr. and Mrs. F. Nidle last Friday.

Mr. and Mrs. R. MacFarlane and Mrs. C. Brown visited with Mrs. J. Hosgood on Sunday.

Mr. and Mrs. J. Nidle were supper guests with Mr. and Mrs. Vic Schneidmiller on Sunday.

Mrs. E.W. Lowrie, who has returned to make her home in the Inverness district, has her daughter, Miss Isobel Lowrie visiting her. Mrs. Lowrie is taking treatment in the Belvedere hospital but is expected home soon.

Mr. and Mrs. Francis Byrt, of Madden were visiting in the Elton district on Tuesday.

Mr. and Mrs. D. Hosgood were Edmonton visitors for a day last week and returned with a little female bundle.

WEDDINGS

BAPTISTE—GARNER

Cheltenham Methodist Church, London, England was the scene of a pretty wedding yesterday. Miss Grace Garner, daughter of Mr. and Mrs. J. Garner of Didsbury, became the bride of W.O. Richard Baptiste of London, England, son of Mr. and Mrs. W.G. Terry. Rev. Teale performed the ceremony.

To the strains of the wedding march, the bride walked down the aisle in the arm of the groom's uncle, Mr. W.M. French. She wore a gown of white figured satin, a floor-length veil and carried a sheaf of white carnations and gladiolus. Her only ornament was a gold locket.

The bride was attended by Miss Lillian Jackson, maid-of-honor, who wore a yellow sheath gown with matching Juliet cap, and carried a mixed bouquet of anemones.

Mr. John French, cousin of the groom, was best man.

A reception was held at the home of Dr. and Mrs. Terry. Rev. Teale performed the service for the bride, and this was followed by a toast to the bride's parents in Canada.

Mr. and Mrs. Baptiste later left by motor for Cheddar Gorge, where they spent a two week's honeymoon, the bride wearing a dark brown suit with beige accessories. On their return the groom reported to York for flying duty.

**INCREASED CONTRIBUTIONS
TO UNEMPLOYMENT
INSURANCE FUND**

A new high for figures for August contributions to the Unemployment Insurance Fund was announced recently by Hon. Humphrey Mitchell upon receipt of the monthly statement from the Unemployment Insurance Commission.

The employer-employee contribution for last August amounted to \$6,138,115.63. These were the highest figures for any August to date and represent an increase of 15 per cent over the same month last year.

It also means that contributions for the year to date show an increase of \$203,013.52 over the preceding month. This increase is particularly significant in view of many contribution days lost due to strikes.

The August, 1946 benefit payments for the third consecutive month, although the payments are much higher than \$684,878.97 for the corresponding month last year. Disbursements for benefit payments for July, 1946 were \$3,299,938.15.

The government's share in contributions for August amounted to \$1,231,663.13, while the amount on account of staff on leave of securities amounted to \$587,805.65.

These represent respective increases over July, 1946, of \$60,692.71 and \$13,889.53.

Showing an increase of \$5,119,778.15 over the previous month, the balance in the Unemployment Insurance Fund as at August 31 was \$333,424,172.90.

When we're willing to crack old moulds we can shape the new world.

The battle for world peace is not a matter of taking sides about world problems but of taking leadership in solving them.

NEW FOOD CONTRACT WITH UNITED KINGDOM

Canadian food contracts with the United Kingdom, totalling nearly \$50,000,000 in value were announced on September 25, by Hon. James G. Gardiner, Dominion Minister of Agriculture, shortly after his return from the Food and Agriculture conference in Copenhagen, Denmark, and meetings with the British Ministry of Food in London.

Of these contracts, the largest single item is for eggs, valued at approximately \$38,000,000. The Special Products Board has contracted to deliver from February 1, 1947, to January 31, 1948, a total of 7,500 long tons of sugar dried egg powder and 1,750,000 cases of shelled eggs (120 dozen to the case) of which 600,000 cases may be storage eggs. The quantity of eggs required to fill this contract is the same as is required by the current 1946 contract, but the price obtained by the latest contract permits an increase over the 1946 price of one cent per dozen.

Dried White Beans—From Ontario, 560,000 bushels of which a large part is expected to be shipped.

Dried Eggs in SOS—From British Columbia, 2,500 tons of raspberry pulp and 500 tons of greenage pulp. The quantity available for shipment and most of it has already been shipped—will be slightly less than the contract calls for.

Tomato Products—Although no contract has been completed and no quantities are available, there will probably not be available for export a quantity of tomato juice and possibly of tomato paste may be sent to the United Kingdom.

Tomato Products—Although no

contract has been completed and no quantities are available, there will

probably not be available for export a quantity of tomato juice and possibly of tomato paste may be sent to the United Kingdom.

Apples—From British Columbia, 2,250,000 boxes of all which will probably be delivered.

TOURISTS PUT CASH IN FARMER POCKETS

While tourist accommodation in many of the national parks was taxed to capacity this season, it is generally recognized that capacity should be greater. This was stated by R. J. C. Stead, of Ottawa, director of publicity for the federal parks department in a recent address to members of the Alberta Motor Association.

Mr. Stead expressed the view that the No. 1 priority in this country was educating the people as to the value of tourist trade. He showed that purchases of gasoline and other articles by these visitors help to ease taxation.

Speaking of tourist trade, he said the farmers should be fully informed of the situation. If it were made clear to them that tourist trade will help to ease taxation, the attitude of many concerning the value of this industry might change as they were more inclined to stay in Canada.

In addition to purchasing farmers' products, there were many indirect benefits from tourist trade.

\$5,000,000 NATIONAL RED CROSS APPEAL IN MARCH

Plans for a \$5,000,000 National Red Cross Appeal in the month of March, 1947, for its peace time work throughout Canada were announced by Arthur L. Bishop Chairman of the Society's National Executive Committee.

Decision to hold a campaign in March was made at a recent meeting of the National Executive Committee, where it was established that a \$5,000,000 budget represented an appropriate amount of money required to finance the programme.

In making the announcement, Mr. Bishop stated: "From its great wartime undertaking the Canadian Red Cross Society has emerged at the flood tide of its strength. That strength must not be wasted. A wise programme of service to the people of Canada, embracing many important fields of endeavor, has been planned. These plans can become reality only with the whole-hearted support of the Canadian people. We will be counting on that support when the time comes."

It is planned that the \$5,000,000 budget will finance many peace-time services, including a National Blood transfusion Service, the construction of more Outpost Hospitals and the maintenance of those already established, aid to veterans and other services such as Junior Red Cross, Nutrition, First Aid, Swimming Instruction, and Disaster Relief.

PREPARATION OF COCKERELS FOR MARKET

(Experimental Farm News)

Except in the case of capons some degree of fattening or finishing of birds for market is necessary to produce a carcass which will grow well and be suitable for maximum return. Capons, if vigorous and healthy, will usually be fat enough when taken off range to grade well with little if any finishing, says H. S. Gutteridge, Poultry Division, Central Experimental Farm, Ontario. Two facts should in themselves command the practice of fattening for market namely, that the

weight gained during fattening is the most economical of any gain made during the whole growing period and that the premium paid for the improved grade of the market bird is paid not only upon the economically produced gain while fattening, but upon the whole weight of the bird.

Crate fattening and pen fattening are the principal methods of fattening. Fattening in crates is the most desirable because it produces more gain and fat in a shorter time and softens the flesh, producing a very tender carcass. Pen fattening is the best substitute but takes a longer time to produce the same ef-

fect and is therefore less economical. Under satisfactory conditions two weeks of fattening should be sufficient to produce top grade birds with crates, whereas three to four weeks is usually necessary if fattening is done in pens.

If the skim milk or butter-milk should be used to mix fattening feeds. Unwatered whey also gives satisfaction. Oat groats ground not too finely, ground heavy oats from which most of the hulls have been sifted or ground corn are the most efficient of the common grain fattening pastes. Barley, wheat, oats, (with hulls) and barley are the next best in order of merit. A mixture of the best of the above grains wet-mixed as stated above, will give satisfaction. If 7 to 10 per cent of meat meal is added to the mixture, gains considerably in excess of the additional cost of the meat meal should be made, but where not possible the grain and milk mixture should suffice.

Birds should be starved for 18 to 24 hours before fattening and flushed with epsom salts (3 lb. per 100 mature birds). They should have water to drink between feedings. Feeds should be mixed to consistency which will just pour and be given twice daily in such quantity that they will clean it up in twenty minutes, any residue being removed. Starve the birds for from 10 to 14 hours before killing and chill as quickly as possible after killing. Such fattening treatment should prove a profitable venture and produce the quality which encourages return orders from satisfied customers.

RECORD PRODUCTION OF PULP AND LUMBER ANTICIPATED

Canadian forest industries have laid plans for a substantial increase in logging activity this winter in anticipation of reaching an all-time high in the production of lumber and pulp products in 1947, it was announced recently by Hon. Humphrey Mitchell, Minister of Labour.

"I am convinced," the Minister said, "that any man who is physically fit and willing to work can, with short experience, make worth-while wages in this healthy, out-

door work." He pointed out the advisability of the newcomer to the woods getting started during the fall.

The Minister stated that to obtain this increased production, forest operators were expected to employ well over 200,000 men in the bush at the peak of the cutting season this coming winter, & the present time applications for woodworkers throughout the country exceed 35,000 and local National Employment Service offices report demands are increasing steadily.

In view of the tremendous demand for forest products and the large number of unfilled vacancies for woodworkers, the Department of Labour in co-operation with the Provinces and forest industries have begun an active woods labor campaign to find men suitable, available men to accept woods employment, the Minister said.

In British Columbia the number of openings for bushmen, especially skilled workers, is the highest it has been for some time. Lumber operators in Eastern Canada are now just starting with operations and it is expected that the demands in Ontario, Quebec and the Maritimes will be even higher than last year. Due to the withdrawal of German prisoners of war from the forest labour supply, operators in Alberta and Northern Ontario will be looking to the Prairies for an increased number of woodworkers as soon as the harvesting has been completed.

The Minister stated that operators in all parts of Canada, realizing that there is a definite limit to the number of experienced lumbermen available, are now making special efforts to aid new men to get into the lumber industry as quickly as possible. Many operators are providing a practical form of training to teach the newcomer, and others, general logging practice and skill in the care and use of tools.

"I am convinced," the Minister said, "that any man who is physically fit and willing to work can, with short experience, make worth-while wages in this healthy, out-

Food For Peace

HISTORY HAS SHOWN that war and rebellion have frequently been the direct result of lack of food. People who are hungry are desperate and are willing to attempt any means of improving their conditions, making them a ready prey for unscrupulous leaders and distorted ideologies. It is now recognized that one way to keep peace among the nations is to ensure equitable distribution of food in every part of the world, at prices which will make it available to all levels of the population. With this end in view, the United Nations' Food and Agriculture Organization, which has proved so far to be one of the most active of the United Nations' organizations has proposed an international grainary to be administered by a permanent world food board, combining the work now carried on by U.N.R.R.A. and the international emergency food council.

Stable Prices should be based upon a world minimum and maximum price of foodstuffs as a basis of the anticipated supply and demand. Any commodity being in excessive supply, and the price falling below the minimum, the board could buy it up until the price was stabilized. In reverse, it could place on the market additional supplies of foods whose prices had risen above the maximum. It is also proposed that the board should organize a six to twelve months' food reserve, to be used in case of crop failures should any one commodity be produced in such quantity as to threaten the world balance, the board would have the power to set export quotas between the producing nations. Funds would be necessary for the operation of a board of this nature and it was suggested that these could be raised, in part, at least by contributions from the nations benefitting from its services.

Might Produce Wide Benefits In suggesting the plan for a permanent world food board, the Food and Agriculture Organization emphasized that development of trade and industry would be necessary for its success, since they provide the money to purchase food. Any matter connected with agriculture is also of vital interest in any country in which would ensure stability of the food supply and affect a large part of our population. Farmers have suffered much in the past due to world market conditions which are far beyond their control, and a well organized world food board, such as the Food and Agriculture Organization has proposed, might bring considerable benefit both to producers and consumers in many parts of the world.

Nesa, a transparent coating for glass windshields which conducts electricity evenly across the surface, preventing the formation of fog and interior fogging in aircraft. William O. Lytle, Pittsburgh Plate Glass research engineer, is credited with developing Nesa. Tests show no distortion of vision, no material reduction in light intensity and an added benefit of impact resistance. Nesa treatment can be applied to plate glass, laminated safety glass, and multiple-glazed units. Electrical contact is made through metallic bus bars at the glass edge.

Birds For Canada

Shipment of Animals Has Arrived From Britain

Nine birds (several of which were pigeons) and eight valuable dogs arrived in Montreal recently from London, England. The dogs, which included one valued at over \$1,000 comprised four champion bulldogs, a cocker spaniel, and three Welsh corgis (squat, short-haired, terrier-like dogs). The bulldogs were valued at over \$1,000. The bulldogs were destined to Duncan, B.C.; the corgis to North Hatley, Que., and the cocker spaniel to Abbotsford, B.C. The seven canaries were destined to Windsor, Ont., and two racing pigeons were bound for Calumet City, Illinois.

PREFER THE FARM

Girls Helping Out During Summer Want To Remain

CLARKSON, Ont.—The nucleus of a "back-to-the-land" movement might be found among the "big city" girls who have been spending their summer months on farms in this district about 20 miles west of Toronto.

Comprising university and high school students, typists, stenographers, secretaries, nurses and girls well disposed to farming as a career. In fact, some of the girls said they would prefer to marry farmers rather than city men.

"I'd love to live on a farm all my life," said one pretty blonde. Miss Diane of Quebec City. Claire, just turned 19, could only say "yes" and "no" in English before she came here and now has a large vocabulary at her command.

But if a farmer boy proposed to me, I'd say 'yes' any time," she added.

Valerie Charlesbros of Fort William is seriously considering giving up her chosen profession as a stenographer to become a farmer. Miss Charlesbros, 18 and Isabelle Margaret Willis, a student majoring in psychology at the University of Toronto, said she was quite willing to trade her degree "for a few acres of ground any time."

Housing Drive

Some Details Regarding Construction In Britain During Current Year

The rate of progress of Britain's housing drive is increasing. White Papers published on August 29th show that during July 10,395 houses were completed of which 5,109 were permanent. This is the highest figure ever recorded in Britain. The total number of houses completed with June 30th total of 8,490. The total number of houses completed since April 1st, 1945, is 60,452, 20,027 of which are permanent, and of these 2,575 are blitzed houses completely rebuilt. Private enterprise has been responsible for the largest part of the permanent houses completed to the end of July, in building 11,917 compared with 8,110 built by local authorities. During July work has begun in Britain on 14,295 new permanent houses. Local authorities are employing 11,260 while 2,233 are being put up by private builders. Since March accommodation in all categories—permanent and temporary houses repaired or requisitioned houses—has been found for 202,097 homeless families in Britain, an increase of 11,516 in July.

A glance at the figures for dwellings now under construction in Britain shows that preference is being given to permanent houses. Out of 10,000 new permanent houses only 2,629 are temporary. The increase during July of houses in the course of construction is 19,177.

Excluding prisoners of war 521,800 men were employed on houses in England and Wales at the end of July. In the total the total was 515,960 while in July, men employed daily 329,400. As repairs to damaged houses decline so men are switched to the building of permanent houses. Scotland's labor force in July totalled 45,550.

World Brotherhood

Can Never Be Obtained Apart From Christianity

PHILADELPHIA—World brotherhood and peace will never be attained apart from Christianity, the Archbishop of Canterbury, Most Rev. Geoffrey Francis Fisher, D.D., said at the closing session of the 46th National Convention of the Brotherhood of St. Andrew, Episcopal Lay Organization.

GEMS OF THOUGHT

BUSINESS OF LIFE

To cultivate kindness is a valuable part of the business of life.—Samuel Johnson.

Let us serve instead of rule, knock instead of push at the door of human hearts, and allow to each and every one the same rights and privileges that we claim for ourselves.—Mary Baker Eddy.

We can only have the highest happiness by having wide thoughts and much feeling for the rest of the world.—George Eddy.

Teach us delight in simple things And much that has no bitter springs;

Forgiveness free of evil done, And love to all men 'neath the sun.—Rudyard Kipling

Our grand business in life is not to see what lies dimly at a distance, but to do what lies clearly at hand.—Carlyle.

Let us see to it that our lives, like jewels of great price, be noteworthy not because of their worth, but because of their weight.—Seneca.

In New York the Tailors Guild was told that a man to be well-dressed should have six business suits and 12 pairs of shoes.

FAMOUS ARCHITECT

Canadian Who Designed Empire State Building Is Dead

HASTINGS-ON-HUDSON, N.Y.—Richmond Hartshorne Shreve, the Nova Scotian architect and modern man's most impressive structure, the Empire State Building in New York City, died here recently. He was 69.

Member of a New York firm which designed the 102-story Empire State Building, Mr. Shreve also aided in the designing of New York City's second most valuable real estate property, the \$80,000,000 Rockefeller housing development in the East Bronx.

Rockefeller, a 13,000-apartment residential and business project owned and operated by the Metropolitan Life Insurance Company, houses nearly 40,000 residents in 51 buildings covering 129 acres of land. Its taxable valuation is second only to the Empire State Building in mid-Manhattan.

The development comprises buildings ranging from six to 13 storeys, each with a dozen or more apartments.

Mr. Shreve was born in Cornwallis, N.S. He was a son of Very Rev. Richmond Shreve, once Dean of the Anglican Cathedral in Quebec City.

Farm Competition

Two Quebec Farmers Were Awarded Gold Medal

QUEBEC—J. A. Eccles of Sweetsburg and Philibert Audet of Compiegne have taken the first and second place respectively in the 1945 Agricultural competition for farmers of the province. Minister of Agriculture Laurent Barre announced.

The two farmers became Commanders of the Agricultural Order and will be awarded the Gold Medal.

Quebec provincial exhibition.

Mr. Eccles placed first with \$62,500 in value, while Mr. Audet obtained \$62,000 in the silver medal section.

Raoul Poitras, of Ste. Helene, Bagot County, headed the 100,000 farmers in the competition this year, attracted 70 candidates in the different classes: professional farmers 11, gentlemen 2, silver medal 38, and bronze medal 28.

When your BACK ACHES...

Backache is often caused by lazy kidney

action. When kidneys get out of order excess acids and poisons remain in the system. Then backache, headache, rheumatic pain, disturbed rest and the rest of the ills we so soon follow. To help keep your kidneys working properly—use Dodd's Kidney Pill. Take a tablet, pop it in a glass of water, then let it dissolve. It's Dodd's Kidney Pill. Take a tablet, pop it in a glass of water, then let it dissolve. It's Dodd's Kidney Pill.

Leader Of Public Opinion Must Think Not Of One Section But Of Welfare Of The Nation

UNDER the heading of "Arousing the giant that is public opinion," Allan Nevins, professor of American History at Columbia University, contributed the following comment in the magazine section of the New York Times: There are many currents, eddies and strands in public opinion. Propagandist bodies, selfish cliques and pressure groups all try to palm themselves off as representing dominant mass sentiment. Prejudices, passions and divergent interests assist in keeping the great sea of national

In wartime the unity of public opinion is marked by its elevation. In reconstruction when the national fabric is being reshaped in ways which necessarily profit some and penalize others, a particularistic self-interest dominates public opinion. How can we lessen such friction and release forces which will challenge national idealism? How can we call public opinion forth? How can we make sure that it asserts itself with general if not invariably common sense and truth?

However, as times change, the vital principles in evoking the best of the forces latent in democratic opinion remain the same. Three in number, they have not altered since public opinion was effectively born in Britain, America and France in the eighteenth century:

The first principle is the importance of the leader, the dominating individuality. The best kind of leader, the people always feel instinctively, is the man who thinks not of party or section, but of the welfare of the whole nation. The masses have never failed to respond to such a leader.

The second principle is to cast aside sectional jealousies and cast aside

The real statesmen always lift the citizens to their own level. The British used to say that the tone and ability of Parliament rose and fell with the Prime Minister guiding it.

The second principle is calling for the best side of public opinion as a program. We do not need a five-year plan—but we do need something substantially its equivalent. Taken together leadership and a program can evoke enthusiasm, and enthusiasm is the vitalizing force of opinion.

The third principle is to bring us, such national purpose as we had—and we had plenty of it—was mainly embodied in the New Deal. Back of that lay other programs: The New Freedom of Wilson, the New Nationalism of Roosevelt, Roosevelt's new social justice program of the Progressives and Progressives.

The ancient Etruscans invented dental restoration and false teeth by fitting artificial teeth in bronze bands or "bridges."

Broadloom means any carpet wider than 27 inches, the width of the original looms, and does not refer to a solid color.

The rat-tailed maggot, living under the water, breathes air by extending its tail to the surface, like a diver's airline.

It is estimated that an ordinary elm tree of medium size will give off 15,000 pounds of water on clear, dry, hot day.

Matches can be waterproofed by dipping the heads in a creamy solution made by dissolving shellac in alcohol.

Agriculture, including stock raising and horticulture, is the most important single industry of the Canadian people.

Margarine was first developed by a French chemist in 1870 to ease a fat shortage resulting from the Franco-Prussian War.

The Chinese queue originally was a mark of subjugation imposed by the conquering Manchus in 1644.

In the time of Queen Elizabeth, the English were required by law to eat fish on 155 days of the year.

Half a million of the known organic chemicals can be produced from oil.

The ancient Egyptians used lassos in hunting game in the desert.

THE JERSEY CATTLE

The first post-war shipment of pedigree Jersey cattle is shortly to leave for China, 200 pounds for stock farms in Canada. Efficient precautions are being taken to safeguard the cargo which constitutes probably the largest and certainly the most valuable consignment of cattle ever to leave Jersey.

Washington Scene

Combination Of Circumstances Cause A Great Deal Of Confusion

WASHINGTON.—Observers of a recent meeting of the Senate had spots before their eyes—red, blue, black spots—and there was not much an optician could do about it.

Red predominated in this color scheme and it was not just administrative red tape.

Newsreels and radios screened the warnings of the extremists against a mounting threat of trouble with Russia and her satellites.

Black markets continued to be a problem in connection with virtually everything in short supply, from automobiles to food.

The black stuff was supplied by the stock market reports from New York, where a combination of circumstances, variously interpreted put many issues on a \$1,000,000,000 skid.

There was another and more pleasant color, the golden sunlight of the sunsets which tried to stay. Jackson has enjoyed in years. Ironically enough, this was the first summer in years the bulk of Washingtonians were able to get away from the city's heat and movement in droves, including President Truman.

The President and other holidaying administrators returned this week to a maze of political and international uncertainties that will tax the best brains available if a way is to be found to peace and comparative security.

Many Tourists

Three-Quarters Of A Million Visitors To Canada's National Parks

PRELIMINARY returns show that at the end of August, well over three-quarters of a million visitors had entered the national parks of Canada since the opening of the present tourist season. This information has been issued in a statement released recently by the Honourable G. W. L. Diefenbaker, Minister of Mines and Resources.

The figure was another and more pleasant color, the golden sunlight of the sunsets which tried to stay. Jackson has enjoyed in years. Ironically enough, this was the first summer in years the bulk of Washingtonians were able to get away from the city's heat and movement in droves, including President Truman.

The President and other holidaying administrators returned this week to a maze of political and international uncertainties that will tax the best brains available if a way is to be found to peace and comparative security.

Control Commission Leaders Would Establish Democracy Among Germans In British Zone

By Ross Munro

BERLIN.—Through the German press, radio, books and entertainment, British control commission leaders are seeking to re-establish democratic thinking and the democratic ways of life among 22,000,000 Germans in the British zone. Stress is laid on the function and importance of newspapers and 34 papers now are running under British control. Allocated 1,250 tons of newsprint a month, these four-page dailies have a total circulation of about 4,500,000, providing approximately one paper for every five Germans.

With the exception of one British daily, Hamburg with a circulation of 250,000 daily, all papers are run by Germans under a British editorial license. The chief difficulty facing the British information organization which handles newspaper problems is to get capable Germans to run German papers.

The large British licensed German paper is the Berlin Telegraph, a Socialist sheet with circulation of more than 400,000 daily. This is larger than any Russian licensed paper in Germany. The Telegraph with tremendous influence in Berlin, where the current conflict between Communists and Socialists focuses.

Papers now operating under British license include 12 Socialist and two Communist. The rest are run by either the British government or by non-party or run by small groups.

In explaining the newspaper situation to Empire Press Union delegates here, British officials said licensed papers are not censored when published, but teams of British editors keep an eye on what is printed and check up editors who go too far.

Editors are told not to publish anything severely critical of other Allied powers. Criticism of the British is permitted in some degree but more severe or virulent criticism is held in reserve for the British government.

German-operated papers have not caused the British any serious trouble and no editors have had to be removed so far.

Papers give considerable space to foreign news which they receive by wire from the British-sponsored German news service, carrying 30,000 to 40,000 words a day.

In the radio field the main station of the British zone, which has a 100-kilowatt transmitter and three subsidiary ones, This Hamburg station was one from Nazis that all news and all broadcasts throughout the war.

Broadcasting has not yet been given over to the Germans and all key positions are in British hands. It will take a long time to eliminate the deep-seated belief imbued by the Nazis that all news and all broadcasts are simple propaganda.

The British hope eventually to open 10 information centres throughout the zone and in Berlin, where the Germans can get newspapers, magazines and books giving information on democracy and the British Commonwealth.

Indian Army

They Will Have The Saving Habits Strongly Developed

NOTWITHSTANDING the many savings depots have adopted the slogan "Nothing is Useless," and have taxed their ingenuity to find ways of utilizing old and apparently worn out equipment.

Living back of old maps, for example, are used for bandages and old mosquito netting makes curtains or roof covers for hospitals. Army greatcoats that can no longer keep anyone warm now keep water cased and bottles serve as flower vases, drinking glasses and ash trays. Even trays and ashtrays are reclaimed as washbowls, lamp shades, office trays or fly traps.

The literal meaning of the word oxygen is "acid former".

Signposts on the northwest frontier of India carry drawings, as many of the natives cannot read.

7401

Alice Books

You'll keep warm this winter by cuddling your "tootsies" into these quilted slippers. Make them to size or buy them in stores.

So easy and inexpensive to make. Pattern 7401 has directions, pattern for small, medium, large sizes.

Our pattern includes a complete set of easy-to-sew charts and photos, complete directions—makes needle-work easy.

Pattern 7401 costs twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, Main Street, Winnipeg, Manitoba. Be sure to write plainly your Name, Address and Pattern Number.

WEST INDEPENDENCE

COPENHAGEN.—Residents of the Faroe Islands, the tiny group of islands lying midway between Iceland and the British Isles—voted recently on whether to become independent or continue under centuries-old Danish sovereignty.

Signposts on the northwest frontier of India carry drawings, as many of the natives cannot read.

Lorne Leppington has moved in to his new home west of the Atha Lumber Yard.

Walter Edmiston, old timer of the Didsbury district who for the past ten years had resided in the Carsairs area, died at his home on Sunday night.

Anyone who is proud is lonely.

The Thanksgiving week end brought of good weather and sun, with blue skies and warm weather, but in the afternoon clouds gathered, and during the night snow fell. Monday was cold and snow lay on the ground all day. Tuesday dawned clear and bright and it is hoped that the weather man will keep in good humor until threshing is completed.

Miss Violet Russell of the Red and White staff spent the week end in Ked Deer.

Mr. E. Bertsch and Ernie Wilkins motored to Rockyford on Monday for the opening day of the pleasure shooting season.

John Kercher spent the Thanksgiving week end at the home of his parents, Mr. and Mrs. E. Kercher.

Mary Wood and Don Mortimer, who are attending University at Edmonton, spent Thanksgiving week end at home.

The first meeting of the Rangers Girl Guides will be held on Monday, October 21st at 7:30 p.m. in the Lions Hall.

Mrs. W. Herewell received a surprise visit recently from her sister Florence and family of Sydney, B.C. Mr. and Mrs. Otto Matley motored out and he will help with the harvesting on his farm at Dalroy while Mrs. Matley and the children visit with relatives and friends in Olds and Hamletton. Mr. and Mrs. Matley arrived to the coast two years ago and like it immediately and are glad to renew acquaintances with old friends again.

Mr. and Mrs. D.J. Wilson and son, W. Wilson, visited from Mr. and Mrs. W. Wilson's home in the week end holiday. Mrs. Wilson and son, Gary, sailed from Southampton on the 14th of September and docked in Halifax four days later, making a record trip.
